

House File 561

H-1332

Amend House File 561 as follows:

1. Page 8, after line 33 by inserting:

<3A. Prior to filing an application pursuant to section 476A.3 to build a nuclear generating facility including but not limited to small modular reactor technology, or seeking authority pursuant to a combined construction and operating license or an early site permit from the United States nuclear regulatory commission, a utility shall conduct an assessment for the twenty-year period subsequent to its anticipated filing date relating to the following:

a. Projected energy demand.

b. Energy efficiency and conservation trends, practices, and requirements.

c. Industrial cogeneration of electricity.

d. Renewable energy trends, practices, and requirements.

e. Transmission improvements.

f. Options for meeting the projected demand through means other than energy efficiency.

g. Projected environmental impacts including greenhouse gas emissions.

h. Projected grid reliability.

i. Projected energy costs.

j. Projected energy supply payments to citizens of this state.

k. Projected energy-related employment outlook and impact.>
